

Candidate Use Cases																
Example Relationship Database Development																
Predictability values - high/med/low																
Task clustering values - daily, weekly, monthly, annual, random uniform, random clustered																
7/24/2003																
***** With system support *****																
***** No System *****																
***** Impact columns subjectively rated 1-5, 5 highest *****																
ID	Desc	Predictability	Task clustering	Current frequency per year	Avg. person-days (each repetition)	Current total person-days per year	Current system support level	Person-days (per rep) wo system support	No system total person-days per year	Product quality impact	Product consistency impact	Increased efficiency impact	Impact on related tasks	Impact in support of Ad hoc tasks	Total impact score	Falls within current project scope
